

a) the edges are no more co-expressed than random pairs

b) their partners do not move together either

c) the edge directions do not transfer either

the 104 estimator-proposed edges that share a gene pair with TRRUST v2

TRRUST

A → B
B → A

every thread crosses over

0 of 104 keep the curated direction

estimator

A → B
B → A

TRRUST

A → B
B → A

about half would cross over

52 of 104 expected by chance

independent

A → B
B → A

d) but the core transfers to TCGA-HNSC
